About Us

Hygeia Pest Control is a joint venture based in Dubai launched with a far sighted vision and focus to provide high quality, safe and effective methods to control any pest problem in your residential or commercial premises. The organization is operated by qualified and competent professionals with dedication and commitment to achieve company mission and customer satisfaction. Our expertise and practical experience enables us to provide best pest control services at very competitive prices.

Our Mission

“Our Mission is to protect your home, business and environment by providing best pest control services using most advanced, scientific, eco-friendly and integrated pest management solutions.”

Why Hygeia

Our Methods

We emphasize on Integrated Pest Management (IPM) System. It is a process for achieving long-term, environmentally sound pest suppression and prevention through the use of a wide variety of technological and management practices which involves:

- ▶ Identification Of The Pest Species
- ▶ Pest Proofing & Sanitation
- ▶ Non Chemical Control
- ▶ Chemical Control
- ▶ Monitoring

We Expertise In

CRAWLING INSECTS CONTROL

Cockroaches, Ants, Silverfish, Fleas, Spiders, Lizards.... We exterminate them with ecofriendly non-chemical & chemical methods to protect your home and business.

FLYING INSECT CONTROL

Flies are not only nuisance pests, but many are also responsible for disease transmission. Our specialized Flying Insect Control Program (FICP) will eliminate all fly problems using a variety of control measures including broadcasting insecticides at the breeding areas, spot treatment and space treatment.

RODENT CONTROL

Rodents are potential threat to our health and property. Our qualified exterminators do rodent control with an emphasis on the safety of pets, children and other non-targeted organisms. Latest technology and effective management practices are our weapons against rodents.

BED BUG CONTROL

Bedbugs are oval, wingless small insects with a flat body. They normally cling on to your clothes, luggage, furniture or bedding and there by enter into households. An early detection is critical to prevent a larger infestation. Hygeia's professional expertise in bedbug management offers consistent solution and friendly informative technical advices to exclude your bedbug issues.

BIRD CONTROL

We are an integrated, long term solution provider, able to help you and your organization reduce risks such as respiratory ailments, viral infections, food poisoning and property damage due to bird pests. Our bird control solutions include the use of innovative products such as bird netting, spikes, deterrents and repellents.

DISINFECTION

Our highly advanced disinfection program reduces the amount of bacteria, germs and harmful microorganisms to keep your family out of various infectious diseases.

Our Integrated Pest Management Services are in compliance with the prerequisites of International Food Safety Management Systems.
